Information Session for Parents and Carers on Drugs and Alcohol

18th March, 6.30-7.30 p.m.

Since 1984, Re-Solv has been the leading national specialist charity in training and education around Volatile Substances and other new emerging drug trends. Based in Stone, Staffordshire, we have vast experience within the sector and work closely with a wide range of statutory services, schools and colleges.

Current research shows that the sooner parents or carers start to have conversations with young people about drugs and alcohol the better the long-term outcomes – ideally before young people start secondary school.

Re-Solv have been invited to St Joseph's Prep School to host an evening session for parents and carers. During the session we'll cover:

- Introduction about Re-Solv
- Overview of current substances often encountered by young people
- New and Emerging drug trends e.g.:
 - What is "Monkey Dust" and "Spice"
 - The popularisation of Nitrous Oxide (Laughing Gas)
- Q&A session to answer any specific questions about drugs and alcohol that you may have around young people's usage of these substances
- Tips on how to get the conversations started with young people about drugs and alcohol
- Resources and information available
- Local services signposting

We do hope you'll be able to join us and look forward to meeting you there.
